The Netherlands

PB International B.V. declares that the product:

LegioSafe article number 10237

is manufactured with a ultrafiltration polymer fiber with a pore size of 0.2 micron. This fiber is certificated:

- NSF/ANSI 61
- KTW
- WRAS

LegioSafe is a dedicated product produced for HomEvap B.V..

The assembled filter module is produced according the KIWA BRL K14010.1 guideline for alternative methods for Legionella prevention.

The filter module of PB International B.V. is tested in a long term test in the Hygiene Institute of Gelsenkirchen. Within this test the product is successfully tested on Legionella reduction for 15 months.

All LegioSafe products are 100% tested on integrity according to the ASTM D6908-03 guideline.
